```

### 1.2.2 Green's Theorem

```

1  #include "../headers/headers.h"
2
3  // O(1)
4  // Circle Arc
5  double arc(double theta, double phi)
6  {
7  }
8
9  // O(1)
10 // Line
11 double line(double x1, double y1, double x2, double y2)
12 {
13 }

```

## 1.3 Pick's Theorem

Given a simple polygon (no self intersections) in a lattice such that all vertices are grid points. Pick's theorem relates the Area  $A$ , points inside of the polygon  $i$  and the points of the border of the polygon  $b$ , in the following way:

$$A = i + \frac{b}{2} - 1$$
